

Testimonial Platform - Project Requirements Document (PRD)

Version: 1.0

Frontend: React + Vite

Backend: Node.js + Express.js

Database: MongoDB Atlas (Mongoose ODM)

Project Overview

Build a testimonial management platform where customers submit testimonials, businesses moderate them, and approved testimonials are displayed publicly and optionally embedded on external websites.

Primary Goal (P0)

Submission → MongoDB Atlas → Moderation Dashboard → Approve/Reject → Public Testimonial Wall.

Functional Requirements

1. Public Submission Form

- Name, Email, Company, Testimonial, Rating (1-5), Optional Photo.
- Validate required fields.
- Store with default status=PENDING.

2. Backend REST APIs

- POST /api/testimonials
- GET /api/testimonials
- GET /api/testimonials/approved
- PATCH /api/testimonials/:id/approve
- PATCH /api/testimonials/:id/reject

3. Database (MongoDB Atlas)

Collection: testimonials

Fields:

- _id
- name
- email
- company
- message
- rating
- photoUrl
- status (PENDING, APPROVED, REJECTED)
- createdAt
- updatedAt

4. Moderation Dashboard

- View all testimonials
- Approve / Reject actions

5. Public Wall

- Display only APPROVED testimonials.

Optional Features (P1)

- Embeddable iframe widget
- Accent color customization
- Duplicate detection
- Pagination
- Loading, Empty and Error states

Stretch Features (P2)

- AI Sentiment Analysis
- Deploy Frontend (Vercel)
- Deploy Backend (Render)
- MongoDB Atlas Cloud Database

Technology Stack

Frontend:

- React
- Vite
- React Router
- Axios
- Tailwind CSS

Backend:

- Node.js
- Express.js

Database:

- MongoDB Atlas

ODM:

- Mongoose

Recommended Folder Structure

```
client/  
  src/  
    api/  
    components/  
    pages/
```

routes/
App.jsx

server/
config/
controllers/
models/
routes/
middleware/
app.js

Acceptance Criteria

- Customer submits testimonial.
- Data stored in MongoDB Atlas.
- Dashboard displays pending testimonials.
- Approve/Reject updates status.
- Public wall shows only approved testimonials.
- Responsive UI with validation and loading/error states.
